Supply Chain Management Graduate Programme Overview:

The supply chain function is an integral part of Parker’s success, and they have dedicated teams across their divisions throughout the world and Poland.

The role will see you being based in three placements over a two-year period, with eighteen months being spent in the Poland and six months in Europe.

You will be responsible for delivering business results from day one whilst you work alongside some of their most successful people to gain new skills and get their support.

You will have maximum exposure to the business management team and deal with challenging situations that will push your professional development in a positive direction.

Supply Chain Management Graduate Programme Job Purpose and

Responsibilities: In the two years of your development programme you will:

- Get to know Parker's business, working in Supply Chain.
- Work at Manufacturing Plants, in Divisions, and support specialist functions.
- Learn how to generate the preparation and communication of the rolling forecast (S&OP).
- Implement, monitor and expand processes to balance on-time delivery and inventories.
- Ensure the management of goods receipts incl. prioritization in order to avoid capacity constraints.
- Work in warehousing from goods receipt, to put-away, storage, pick & pack to ship in close collaboration with their Lean teams.
- Familiarize and use the procurement best practices, being actively involved in negotiations with suppliers.
- Take responsibility for your own projects to further improve Parker's supply chain performance.

Supply Chain Management Programme Qualifications, Skills, Experience and Personal Attributes:

- Minimum Bachelor's Degree in engineering or business administration and ideally one year work - or internship experience - in a Supply Chain or Engineering environment.
- First hand experience in project management is a plus.
- Excellent influencing and interpersonal skills.
- Process-driven, organised and disciplined.
- Ability to learn all aspects of a commercial business quickly.
- Strong analytical thinking as well as problem solving skills and sense of costs awareness.
- Initiative, self-starter approach, and strong communications skills.
- Good team player with a challenger mentality.
- A desire to gain international experience and openness to different cultures.
