

Take the opportunity to work in challenging, international environment and develop your professional excellence in organization basing on modern Supply Chain Model.

You will focus on:

- Managing transport planning activities in an effective and cost-efficient manner
- Solving problems in relation to pick-up, transport, and delivery (in case of delays, difficulties etc.)
- Following-up cost, complete analyses and maintaining databases
- Organizing single transports and managing offers and sending Express consignments
- Share knowledge and best practice with other parts of the organization
- Closely cooperate with customers, Electrolux stakeholders and external suppliers

You:

- Acumen demonstrated. You draw attention to details, analyse and manage complex amount of information. You notice correlations and draw accurate conclusions.
- Good listener communicator. You have ability to collaborate in cross-functional team and external suppliers effectively
- Relevant judgement and making decision focused. You consider all the available sources of information and alternatives. You weigh up the pros and cons and identify the potential consequences.
- Proactive. You're not just solving the tasks you are given, you always think ahead.
- Ambitious & eager to learn. You demonstrate resilience in the face of setbacks and attitude towards learning new skills beyond what is required and transfers learning to new situations.

Education & experience:

- University degree in Transportation/Logistics/ Economy
- Very good knowledge of MS Excel.

Languages: communicative English and Polish
